Good Morning [b] (6) [redacted], thank you for calling regarding the Wilcox Oil Spill Cleanup Superfund Site. Bill Little is the Community Involvement Coordinator and he will add you to our email and mailing list so that you will receive current and up-to-date information on site activities. I am the Environmental Protection Agency project manager for the Wilcox Superfund Site, and I work closely with Todd Downham of the Oklahoma Department of Environmental Quality. Please do not hesitate to call me at 214-665-8143 or 1-800-533-3508, or call Todd Downham, ODEQ, at 405-702-5126, should you have questions or concerns about the site or your property. We will do our best to assist you. [b] (6) [redacted] I have provided a map showing the current site boundaries as they relate to your property (Stempen [b] (6) [redacted].pdf). As you can see, your property is [b] (6) [redacted] of the current investigation area. At this time, we are still investigating the Wilcox Site. [b] (6) [redacted] and also includes an investigation of [b] (6) [redacted]. We are planning to be out at the site this summer to continue investigating the soils as well as the creek. Please find attached, some site literature to help you understand the site better as well as the cleanup process we are using to investigate and potentially clean up the site. This information can be shared with any other person interested in the site. The ATSDR ToxFaq's are information related to the contaminants we know to exist on the site. Provided below is a web link to the site information as well as site reports that have completed thus far. Thank you for your time and I look forward to talking with you.
